THE ETHICAL IMPERATIVE

106TH ANNUAL MEETING
DENVER, COLORADO

CO-CHAIRS
AMIR AMERI
REBECCA O’NEAL DAGG
In its material, cultural, and economic effects, architecture poses essential and unavoidable ethical quandaries and challenges. In its performative capacity to express ideology, architecture is inexorably entangled in questions of power and legitimation. As part of an interconnected global economic infrastructure that consumes natural resources at an alarming rate, architecture raises new and pressing questions with which educators, practitioners, and students must engage.

Given that there is an infinitely ethical dimension to every aspect of architecture, the 106th ACSA Annual Meeting will seek to solicit wide reflection on the ethical challenges of architecture in a world in flux.

Architecture as practice and as discipline and pedagogy struggles to solve problems and to advance culture. Within this struggle the discipline faces an ambiguity of values and agenda. The relationship between these two purposes, problem solving and cultural advancement, often exists as a rift, a great chasm filled with nuanced dilemmas related to ethics and power.

HOUSING & COMMUNITY DEVELOPMENT WORKSHOP
Avenues of Exchange: Building Equitable, Healthy & Resilient Cities

A partnership between ACSA and AIA Housing & Community Development Network
Increasingly, cities are challenged with ensuring equitable growth and ecological health in the face of redevelopment. Architecture and community development professionals are at the forefront of this effort. Using Denver as a springboard, educators and practitioners will gather to learn more about housing and community development projects and practices that promote equity and ecology in the built environment.

Panel sessions will focus on The Denver Story, exploring successes and lessons learned from mixed-income multifamily developments in the fast-growing city, and a discussion on maintaining affordability and preventing displacement nationwide. Workshop participants will also hear from a national leader in development that promotes healthy neighborhoods that are responsive to both community and environmental priorities and tour the recently completed Mariposa District, among other Denver sites.

Workshop Fee: $160 (onsite)

Continuing Education Credit

### DEFINING YOUR RESEARCH WORKSHOP

**09:00 – 02:00**

**SPRUCE**

Hosted by Technology | Architecture + Design Journal (TAD)

Architects are stewards of the built environment who rely on the advancement of current social, environmental, and technical knowledge and innovation for their practice. The architectural discipline has the ethical responsibility to conduct research and contribute to the advancement of these vital areas.

Defining Your Research explores the creation of new knowledge and how, or in which modes, it is being developed into research. Designed for tenure-track faculty, particularly those in the early stages of the tenure process, the interactive workshop will be useful to anyone who would like to strengthen or refresh their research and peer-review publication skills.

During the workshop, participants will engage in exercises to:
- formulate research questions (the need)
- understand the inter/disciplinary contexts these questions/queries operate within (literature review and precedent)
- identify appropriate research methodologies (how)
- examine evidence collection (data)
- evaluate findings (validation)
- communicate these findings (dissemination)

This research framework review will relate modes of creative/innovative inquiries from a broad range of disciplines, including design, engineering, and physical and social sciences.

This workshop will be accompanied by webinars and online interaction that will precede and conclude the workshop. The webinars will showcase speakers from academia, the profession, and industry. It is not required for workshop participants to attend all webinars, which will also be made available on demand.

Workshop Fee: **$160 (onsite)**

### ACCREDITATION CHANGES WORKSHOP

**09:00 – 12:00**

**DENVER**

Hosted by ACSA and NAAB

With NAAB preparing to revisit the Conditions and Procedures for Accreditation in 2019, ACSA and NAAB will co-host a workshop to collect feedback on the existing process as well as begin to explore specific ways to strengthen and streamline the accreditation process for schools. The session will be facilitated by NAAB Interim Executive Director Helene Dreiling, with small-group interactions appropriate for faculty and administrators alike.

Workshop Fee: **Included with Full Registration**
02:00 – 03:30
TOWER COURT A
Paper Session

A QUESTION OF LEADERSHIP:
THE CITIZEN ARCHITECT AND PUBLIC INTEREST DESIGN I

Moderator: Kevin J. Singh, Louisiana Tech University
This session features papers that focus on programs, practices, and projects that
expound upon Public Interest Design/Citizen Architect pedagogical approaches in
schools, and their speculative future impacts within the profession. The papers
will address the questions: What are schools currently doing to address social,
ecological, and environmental issues and prepare the future leaders of the
profession? What methods and praxis are used to explore Public Interest Design in
relationship with community needs? How do we democratize design and serve all
publics?

The Ongoing Dilemma of Professionalism
Robert Corser, University of Washington

Open Source Design
Brian Kelly, University of Nebraska-Lincoln

Social Engagement and the Construction of Place
Katie MacDonald, Virginia Tech

A Socio-Technical Approach to Participatory Design – Learning From Scenario-Based
Planning Practices
Ming-Chun Lee, University of North Carolina at Charlotte

Shaping New Forms of Citizenship through an Adaptive Design Process
Shannon Criss, University of Kansas

02:00 – 03:30
TOWER COURT B
Paper Session

THE FIRST HUNDRED DAYS

Moderator: Heather Flood, Woodbury University
The first hundred days of education are the most productive days of a student’s
time in school. The combination of uncertainty and optimism breeds a willingness
to consume new experiences without hesitancy or prejudice. The first semester
of architecture school (14 weeks x 7 days = 98 days) has the capacity to transform
the intellectual landscape and technical abilities of students at a rate that far
exceeds all subsequent semesters. This session compares and contrasts models of
beginning design pedagogy that seek to maximize the capacity for learning in the
first hundred days of school.

What is Foundation? Are We Really on Solid Ground?
Liane A. Hancock, Louisiana Tech University

Reconstructing Knowledge: Recombinant Strategies for Multicultural Beginning Design
Pedagogy
Pavlina Ilieva, Morgan State University

Fierce Urgency of Now, Architecture Education and the Foundation to Justice
Bradford C. Grant, Howard University

What About the First Hundred Days at a Community College Architecture Program?
Randy A. Steiner, Montgomery College

In The Land Of The Unknowing, Originality Is King
Kyle Miller, Syracuse University
OPEN: PEDAGOGY

Moderators: Mehrdad Hadighi, Pennsylvania State University
Pep Avilés, Pennsylvania State University

Schools of Architecture have been invested in teaching architectural design in a studio environment following the model introduced at The École des Beaux-Arts in France in the late 17th century. The studio model of teaching and learning has been praised and adopted by other academic disciplines, as well as corporations as wide apart as Apple, Porsche, and Google for its rigorous, incremental, thought-through-making process. As professors of architecture, we agree that there is immense value in the studio teaching/learning model but believe that there is room for critique and strategic reshaping. This session concentrates on a critical examination of aspects of the studio teaching/learning environment. Each paper, while building on the studio model, mounts a critical challenge to it.

Creating Equitable Learning Environments in Architectural Design Studios
David Kratzer, Thomas Jefferson University
Evan Pruitt, Thomas Jefferson University

The Academic Supports Provided to African American Female Students in Undergraduate, Pre-professional Architecture Programs
Theodore R. Sawruk, University of Hartford

A Faculty-Librarian Collaboration in the Undergraduate and Graduate Degree Project and Thesis Preparation Courses
Cathryn Copper, Woodbury University

BUILDING BEHAVIORS

Moderator: Shane Williamson, University of Toronto

Climate change has led to an elevated interest in the sustainability and behaviors of buildings, particularly related to energy usage. In addition, lighting, acoustical responsiveness and structural stability are increasingly at the foreground of public interest.

2 x 4 x 4000 : Mass, Material, and Microclimate
Alex Timmer, University of Wisconsin-Milwaukee

Emboss Tower
Jin Young Song, University at Buffalo, SUNY

Senyai: Big Noodles Acoustics
Dana Cupkova, Carnegie Mellon University
Gretchen Craig, Carnegie Mellon University

Shotgun Chameleon
Zui Ng, Prairie View A&M University

The Share: Net Zero Energy, Cross Laminated Timber Urban Housing Prototype
Michael Gamble, Georgia Institute of Technology

BEGIN WITH WHY: VALUES AND ETHICS IN BEGINNING DESIGN

Moderator: Shelby Elizabeth Doyle, Iowa State University

The organizers of this SFS have invited beginning design educators who presented particularly effective and evocative work at the 2017 National Conference on the Beginning Design Student to discuss the question: Does beginning with “why” rather than with “how” offer an approach to developing curricula that better prepares students to enter a rapidly changing and increasingly complex world in which the means and methods of making are in flux? A “why-based approach” foregrounds ethical questions designers must address in each project and challenges students to cultivate their values for how best to thoughtfully respond as opposed to a “how-based approach” that focuses on disciplinary adherence and skill building.

RESILIENCY & ARCHITECTURAL EDUCATION: LEARNING FROM PRACTICE

Responding to the changing conditions of the built environment driven by climate change is a primary concern facing design, construction, planning, and engineering practitioners with urgency and immediacy. There is a need to define the nature of resiliency practice for future professionals of the built environment. This interactive session will focus on a series of four two-part presentations from a resiliency symposium held at Cal Poly, San Luis Obispo in February 2018. We will explore exemplary present work of interdisciplinary firms actively engaged in resilient design, planning and disaster recovery and their views of the future ahead with the goal of shaping the future of architectural and design education.

Bill Siembieda, California Polytechnic State University
Margot McDonald, California Polytechnic State University

A Hunt for the Urban Tectonic: Deriving Relevant Urban Architecture from the Existing Fabric of Our Cities and Communities
William Joseph Doran, Louisiana State University

Strengthening Public Interest Design through the Application of Service Learning Pedagogy: A Case Study
Sallie Hambright-Belue, Clemson University
Martin Holland, University of Guelph

04:00 – 05:30
TOWER COURT B

DRAWING IN THE POST-DIGITAL ERA: FROM EXACTITUDE TO EXTRAVAGANCE
Moderator: Pari Riahi, University of Massachusetts, Amherst
The proliferation of digital media has destabilized architectural drawing by pushing them towards new frontiers. Novel tools and techniques have made some of the conventional modes of operation more efficient, while equally subverting others in favor of new patterns of thought and action. Drawing’s metamorphosis presents a paradox: on the one hand it continues a tradition that has lasted over 500 years, and on the other hand it challenges the tenets of that tradition by implementing methods that are at odds with roles assigned to drawing.

Breaking BIM: A Transformative Design Methodology for BIM
Seth McDowell, University of Virginia

Digital Shadow
Alex T. Anderson, University of Washington

Experiments on Timescape: from Camera Apparatus to Frame Differencing
Catty Dan Zhang, University of North Carolina at Charlotte

Dora Epstein Jones, Academy of Art University
04:00 – 05:30
TOWER COURT C
Paper Session

THE ETHICS OF NEO-ORIENTALIST ARCHITECTURAL PRODUCTION
Moderator: Jason F. Carlow, American University of Sharjah
This session seeks to uncover how Neo-Orientalist practices continue to influence architecture production in the MENA region where reproductions of historical images and the prevalence of Islamic patterns as buildings facades have become ever so prevalent by the democratization of computational tools. The session will include papers that seek to overcome these essentialist attitudes and uncover ethical methodologies in architecture education that critically assess the role of historical archiving, technology, and vernacular material culture.

Designing Pedagogy Against Architectural Iconicity
Jason F. Carlow, American University of Sharjah

The Challenges of Retrieving the Traditional Courtyard Houses of Baghdad
Zahraa Dabbach, University of Cincinnati

Neo-Orientalism and the Search for Identity
Reema Abu Hassan, American University of Sharjah

04:00 – 05:30
TOWER COURT D
Project Session

HOUSING
Moderator: Matt Shea, University of Colorado Denver
As the planet’s population grows it becomes increasingly imperative that housing effectively provide appropriate shelter with reduced means. Housing research varies from historic and emerging typologies to urban and social concerns to evolving family types, all set in a global arena of cultural confluences. Research and design projects in all these areas are encouraged.

Agriculture to Urbanization in Chicoloapan: The Importance of the Ejido in Housing Development
Olaia Chivite Amigo, University of Michigan
Michael Thomas Amidon, University of Michigan

Behind the Quotidian Screen
Ane Gonzalez Lara, University of New Mexico

Odile Decq is a French architect and urban planner. International renown came in 1990 with her first major commission: La Banque Populaire de l’Ouest in Rennes, France. Since then, she has been faithful to her fighting attitude while diversifying and radicalizing her research. Being awarded The Golden Lion of Architecture during the Venice Biennale in 1996 acknowledged her early and unusual career. Other than just a style, an attitude or a process, Odile Decq’s work materializes a complete universe that embraces urban planning, architecture, design and art. Her multidisciplinary approach was recently recognized with the Jane Drew Prize in 2016, and this year she was honored with Architizer’s Lifetime Achievement Award for her pioneering work, but also her engagement and contribution to the debate on architecture.

Odile Decq has been teaching architecture for the past 25 years. She has been invited to be a guest professor in prestigious universities such as the Bartlett (London), the Kunstakademie (Vienna & Düsseldorf), SCI-Arch (Los Angeles) or Columbia University (New York). In France, she was Head of l’École Spéciale d’Architecture (ESA) in Paris from 2007 to 2012. Following this experience, she created her own school in Lyon in 2014: the Confluence Institute for Innovation and Creative Strategies in Architecture.

Her most recent projects include Le Cargo (Paris, 2016); La Résidence Saint-Ange (Seyssins, 2015); Fangshan Tangshan National Geopark Museum (Nanjing, 2015); GL Events Headquarters (Lyon, 2014); FRAC Bretagne (Rennes, 2012); Phantom: Opéra Garnier’s restaurant (Paris, 2011) and MACRO Contemporary Art Museum (Rome, 2010).
FRIDAY
MARCH 16

09:00 – 10:30

Paper Session

STATES OF DISREPAIR / ACTS OF REPAIR I
Moderator: Sabir Khan, Georgia Institute of Technology
How do disrepair, maintenance, and repair figure in the design, fabrication, and use of buildings, products, and systems in and over time? The six papers in these two sessions focus on specific buildings and construction practices. The diverse analytical approaches employed by the authors problematize our understanding of renovation, preservation, reuse, disassembly, material decay, vernaculars practices, new technologies, and the culture of self-repair.

- RE-STORE “Style” as “Technique”: Viollet-le-Duc’s “Historiographic” Attitude and Restoration of Design Principles for Architectural Theory
  Samia Rab Kirchner, Morgan State University
- Repressing Repair: Hans Döllgast’s Neue Pinakothek
  Lynnette Widder, Columbia University
- The ‘Iconic’ and ‘Everyday’ Mid-century Modern- Shifting Attitudes Towards Repair and Preservation
  Priya Jain, Texas A&M University

09:00 – 10:30
TOWER COURT B
Paper Session

A DISCIPLINEADRIFT? TEACHING ARCHITECTURAL ETHICS IN TODAY’S WORLD
Moderator: Paul W. Long, Ferris State University
Chris L. Cosper, Ferris State University
This session seeks to stimulate a discussion regarding architecture’s community, social, and professional responsibility. In doing so, it asks: What responsibility do educators have to promote a broad understanding of ethics; and, do changing ethical considerations in the profession indicate that the discipline is morally adrift? This session presents essays, case studies, and projects that explore the role of ethics across an architectural curriculum and/or examine how ethics may be best integrated into a design pedagogy.

- On the Value(s) of an Architect
  Anastasia Cortes, Virginia Tech
- Crutches No More: Reframing Philip Johnson’s Seven Crutches as Pedagogic Tools
  Kyle Schumann, Princeton University
- The Online Moral Paradox
  Magdy Mohamed Ibrahim, Abu Dhabi University
  Sadeka Shakour, Abu Dhabi University
09:00 – 10:30
TOWER COURT C

Paper Session
OPEN: ETHICS

Moderator: Michael Hughes, American University of Sharjah

The three papers presented in this open session examine ethics across a broad spectrum ranging from the development of a professional code of conduct to the often unanticipated impacts resulting from pedagogical and curricular decisions. Taken together the presentations can structure discussion around the politics of behavior both within and between profession practice and academia while also examining the evolutionary trajectory of ethics in the discipline.

Special Focus Session
INTERNATIONAL ENGAGEMENT BEST PRACTICES AND OPPORTUNITIES

Moderator: José L.S. Gámez, University of North Carolina at Charlotte

This session features a panel of architecture educators and administrators who are experts in international engagement opportunities for students and faculty members. The session begins with concise presentations of international engagement best practices from panelists and is followed by an overview of member school data gathered from the ACSA International Engagement Survey. Round table topical discussions for the specific subtopics concludes the session. Subtopics include study abroad, student exchange, faculty exchange, research partnerships, recruitment of international students, and dual degree programs.

ACSA Leadership Committee: Rebecca O’Neal Dagg, Auburn University; José L.S. Gámez, University of North Carolina at Charlotte; Barbara Klinkhammer, Thomas Jefferson University; Branko Kolarevic , University of Calgary; Sharon Carter Matthews, Wentworth Institute of Technology; Andres Mignucci, Universidad De Puerto Rico; Marilys R. Nepomechie, Florida International University
TECHNOLOGY | ARCHITECTURE + DESIGN JOURNAL SESSION
A presentation of the journal of Technology / Architecture + Design, a peer-reviewed international journal dedicated to the advancement of scholarship in the field of building technology, with a focus on the impact, translation and integration of technology in architecture and design. The journal features articles on primary research in emerging materials, construction techniques, design integration, structures, building systems, energy, environmental design, information technology, digital fabrication, sustainability and resiliency, project delivery, the history and theory of technology, and building technology education. Recent TAD authors share presentations on their research, published in Issues 1:2 (Simulations) and 2:1 (OPEN). In addition, members of the TAD Editorial Board will discuss strategies to prepare a successful submission.

ECOLOGICAL ETHICS (AND THE ROLE OF THE ARCHITECT) I
Moderators: Michael A. McClure, University of Louisiana at Lafayette
Ursula Emery McClure, Louisiana State University

Some of the most pressing ‘ethical challenges of architecture in a world in flux’ might be those surrounding the role of the built environment in climate change. The field of environmental ethics has allowed us to extend the scope of our ethical considerations to non-human inhabitants and systems. How does the architect engage and serve a non-human clientele that has no voice or means to communicate needs? How does this engagement alter our built environment?

Design in the Anthropocene

Gray Read, Florida International University

11:00 – 12:30
TOWER COURT C
Paper Session

OPEN: TECHNOLOGY
Moderator: Justin Miller, Auburn University

This session considers the ethics of technological innovations aimed at design prediction, fabrication, automation, and material systems. With the use of predictive tools for simulating and optimizing designs comes a focus on the parameters informing the prediction. The papers explore the integration of qualitative conditions in the process of both simulation and optimization leading to built artifacts. Running in parallel is a question regarding the automation of these processes and the ethics of automated design and fabrication.

TECHNOLOGY | PEDAGOGY | PRACTICE
Sponsored by Autodesk
Architectural pedagogy continues to be pressured by the dual demands of design education and preparation for practice, both underpinned by rapidly evolving digital technology. New tools for data representation, analysis, digital fabrication, knowledge management and transfer, and artificial intelligence challenge traditional approaches for educating the designers of the future. This talk will explore the future of design methodology, architectural agency, and rapidly-changing delivery methods, and implications for the role of the architect and architectural education, and propose a framework for a digital technology strategy in the architectural curriculum. The talk will be followed by an interactive session with the audience.

Phil Bernstein, Yale University

DESIGN-BUILD EXCHANGE GENERAL MEETING
The db-X organizational meeting with the intent of expanding the db-X network.
The session will cover three avenues of activity:
- Database progress and update
- Update on Peer Review
- Web Conference announcement and Call for Papers

Ted Cavanagh, Dalhousie University
Andrzej Zarzycki, New Jersey Institute of Technology
John Cays, New Jersey Institute of Technology
Emilie Taylor, University of Tulane
Chris Trumble, University of Arizona
NEW FACULTY WORKSHOP
Moderator: William J. Carpenter, DPACSA, Kennesaw State University
A New Faculty Workshop to help define scholarship teaching and research
directions in the academy and also defining how practice can be come a form of
academic research within the objectives of tenure track faculty positions. We will
also discuss how adjunct positions can become a getaway into tenure track hiring.
As part of our discussion the presenters will discuss the pre-tenure, tenure and
post tenure review processes and how they have navigating this nebulous but also
valuable goal and threshold of North American architectural education.

LUNCH
OPEN HOUSE: University of Colorado Denver, College of Architecture & Planning
Conference registrants are encouraged to explore downtown Denver and its many
restaurants. Also, make sure to visit the University of Colorardo Denver’s College of
Architecture & Planning to check out student & faculty work.

1250 14th Street, Suite 200, Denver, CO 80202

DISTINGUISHED PROFESSOR AWARD
Moderator: William J. Carpenter, Kennesaw State University
Recognizes sustained creative achievement in the advancement of architectural
education through teaching, design, scholarship, research, or service.

Dana Buntrock, University of California, Berkeley
Renée Cheng, University of Minnesota
Judith A. Kinnard, Tulane University
Marilys R. Nepomechie, Florida International University
John Ronan, Illinois Institute of Technology

ON THE ADVANTAGES AND DISADVANTAGES OF INSTRUMENTALITY FOR
ARCHITECTURE
Moderators: Gary Huafan He, Yale University
Skender Luarasi, Yale University
This session, “On the Advantages and Disadvantages of Instrumentality for
Architecture,” deals with the question of instrumentality in architecture. There is no
architecture without instruments, and there is no architecture which is not in some way
instrumental. The consideration of instrumentality includes the following modalities:
the architectural technics (analog and digital technologies), the architectural object
(building and cities), and the architectural subject (the agent(s) involved in architectural
production). The session brings critical reflections on our technological, economic and
social milieu today.

Digital Conformity
Rima Ajlouni, University of Utah

Constructed Invisibles: Designing Instruments As and For Effects
Catty Dan Zhang, University of North Carolina at Charlotte

Google Campus One, Driverless Vehicles, and the Ethics of Systems Spaces
Michael Barton, University of British Columbia

The Architect’s Essential Instruments: Implications of Affordance Theory for Construction
Documentation
Luc Phinney, Virginia Tech
ECOLOGICAL ETHICS (AND THE ROLE OF THE ARCHITECT) II
Moderator: Ashlie Latiolais, University of Louisiana at Lafayette

Some of the most pressing ‘ethical challenges of architecture in a world in flux’ might be those surrounding the role of the built environment in climate change. The field of environmental ethics has allowed us to extend the scope of our ethical considerations to non-human inhabitants and systems. How does the architect engage and serve a non-human clientele that has no voice or means to communicate needs? How does this engagement alter our built environment?

Cradles to Cradles: Designing for Non-Human Loops
Leonard D. Yui, Roger Williams University

Fluid Futures
Nikole Bouchard, University of Wisconsin-Milwaukee

When Green was the New Black: What Went Wrong with China’s Eco-City Movement?
Zhongjie Lin, University of North Carolina at Charlotte

ETHICS, DEVELOPMENT AND DONALD TRUMP
Moderator: Thomas Fisher, University of Minnesota

This session will explore various ways that faculty have dealt with political and ethical controversies, have handled disagreements over what to do with those problems, and have explored political and ethical questions as part of coursework.

Politics, Architecture, and a Wall
Ane Gonzalez Lara, University of New Mexico

The Crisis of Monumentality: Mies van der Rohe, Nazi Competitions & Trump’s Border Wall
Andrew Gleeson, Iowa State University

The Unbearable Whiteness of Being: The Racial Production of Architecture & Architects
B.D. Wortham-Galvin, Clemson University
Jackie McFarland, Portland State University

ARCHITECTURE IN AN EXPANDED FIELD, FROM INTERIORS TO LANDSCAPES II
Moderator: Kevin Moore, Auburn University

Scholarship and design-based investigations situated at the architectural scale often slip toward the space of the room or the expanse of the site. Indeed some of the most often studied projects of recent years operate within this larger field of space making. This topic seeks to provide a home for work beyond the precise scale of the building.

Another Stack
Erik Herrmann, University of Michigan
Ashley Bigham, University of Michigan

Architecture as Performing Art: Puddin’ and the Grumble
Peter Olshavsky, University of Nebraska-Lincoln

Desert House
Hans Peter Tursack, University of Michigan

F22 Foto Space
Jason F. Carlow, American University of Sharjah

Iterative Garden
Julia Jamrozik, University at Buffalo, SUNY

Mass-Customized Longboard: Mass Customization and Identity in Skate Culture
Brian Kelly, University of Nebraska-Lincoln

Megalith: A Deterrent
Jean Jaminet, Kent State University
Richard Dempsey, Lightroom Studio
Zach Beale, Handel Architects

Rhizolith Island: Floating Concrete Breakwater for Mangrove Restoration
Julie Larsen, Syracuse University
Roger Hubeli, Syracuse University

Unconventional Structures: Torodial Plume
Jorge Adan Ituarte-Arreola, Texas Tech University
Ryan Lee Thomas, US Army National Guard

Cranes to Cradles: Designing for Non-Human Loops
Leonard D. Yui, Roger Williams University

Fluid Futures
Nikole Bouchard, University of Wisconsin-Milwaukee

When Green was the New Black: What Went Wrong with China’s Eco-City Movement?
Zhongjie Lin, University of North Carolina at Charlotte
**02:00 – 03:30**

**WINDOWS**

**Special Focus Session**

**MOVING TOWARDS AN EQUITABLE FUTURE**

Over the last year members of the ACSA Education Committee have been looking at issues related to diversity and equity as it pertains to students trying to enter into the architecture profession. The committee created and disseminated a detailed survey to all of the US based architecture programs. The intent was to gather a broader, yet concise picture on what is actually required to enter into an accredited architecture program. In this session we will share the preliminary findings from this data in hope of generating a much broader discussion surrounding equity, and highlighting what solutions might exist to help meditate these problems. Participants of the session will get a first look at the data, before further publication. The session review the expected and the not so expected results.

ACSA Education Committee: Derek A. Ham, North Carolina State University; Bethany Lundell Garver, Boston Architectural College; Francis E. Lyn, Florida Atlantic University; Rashida Ng, Temple University; Carmina Sanchez-del-Valle, Hampton University; Elizabeth Seidel, American Institute of Architecture Students; Charles Setterfield, Sinclair Community College

**02:00 – 03:30**

**SPRUCE**

**Project Session**

**HISTORY/THEORY**

**Moderators:** Christian Dagg, Auburn University

Scholarship on historic architects, settings, periods and themes occurs in a variety of research modalities. In addition ideas of design epistemology are often reflected in essays falling under this broad rubric.

- **28 Books and Book Covers in Architectural Theory**
  Regin Schwaen, North Dakota State University

- **Architectural Ghosts : Storytelling & the Architectural Imaginary**
  Zoe Lynne Cope, University of Nebraska-Lincoln

- **Emilio Perez Piñero and the Contemporary Lightweight Collective**
  Jonathan Rule, University of Michigan
  Ana Morcillo Pallares, University of Michigan

- **Spaces of Strategic Adaptation**
  Joseph M. Godlewski, Syracuse University

- **The Façade as an Architectural Interior**
  Patrizio Martinelli, Miami University

---

**02:00 – 03:30**

**DENVER**

**Special Focus Session**

**THE IMPERATIVE FOR MORE RESILIENT EDGES**

**Moderator:** Maurizio Sabini, Drury University

*Sponsored by The Plan Journal*

Research has offered by now sufficient evidence and data that sea level rising is becoming an alarming global phenomenon. Yet, the power of design, with its knowledge and intelligence, can turn this threat into an opportunity and propose and experiment new ideas to make coastal and delta regions around the world more ecologically resilient. This session offers a conversation among selected TPJ contributors, educators and experts on a sample of perspectives presented by the journal’s themed issue on “Resilient Edges.”

Michael Jefferson, University of Michigan
Suzanne Lettieri, University of Michigan
Alexander Ring, Toronto, CA
Ursula Emery McClure, Louisiana State University
Jeff Carney, Coastal Sustainability Studio, Louisiana State University
B.D. Wortham-Galvin, Clemson University
Carl Elefante, Quinn Evans Architects

**03:30 – 4:00**

**I.M. PEI LOBBY**

**COFFEE BREAK**

Conference registrants can mingle and visit our sponsors and exhibitors while enjoying coffee & tea.
Congratulations to all the winners of the 2017-18 ACSA Architectural Education Awards. Tonight, we are joined by our Topaz Medallion Recipient, Jorge Silvetti. Hope to see you all there!

Over the last few weeks, we have been posting the Architectural Education Award winners on our Instagram and Facebook. Head over to our social media channels to learn more about each project.
Jorge Silvetti was born in Buenos Aires, Argentina, where he received his diploma in architecture from the University of Buenos Aires. He continued studies at the University of California, Berkeley, receiving his Master of Architecture degree and pursuing postgraduate work in the area of architectural theory and criticism. Mr. Silvetti formed a practice with Rodolfo Machado in 1974, formally incorporating in 1985.

In addition to his architectural practice, Mr. Silvetti has served as a juror for the Pritzker Architectural Prize since 1996, and in 2000 he became a juror for the Mies van der Rohe Prize for Latin American Architecture. In total, he has received ten Progressive Architecture awards—many in collaboration with Rodolfo Machado—and was the first person to receive awards in all three categories (architecture, urban design, and research). Mr. Silvetti’s writings have appeared in numerous architectural and urban design magazines, including Oppositions, Controspazio, Daidalos, Metamorfosi, Harvard Architectural Review, and Assemblage.

Mr. Silvetti has taught at the University of California, Berkeley, Carnegie-Mellon University, the Polytechnic Institute of Zurich, the University of Palermo, Sicily and Nihon University, Tokyo. Since 1975, he has taught architecture at the Graduate School of Design, Harvard University, where he became tenured Professor of Architecture in Design and Design Theory in 1983, was Director of the Master of Architecture program from 1985 to 1989, and was named Nelson Robinson, Jr. Professor of Architecture in 1990. From 1995-2002, he chaired the Department of Architecture at Harvard, where he continues to teach. He has also been appointed to the Art of the Ancient World Visiting Committee at the Museum of Fine Arts, Boston.
**REGISTRATION:**
Sheraton Denver Downtown Hotel
2nd floor, I.M. Pei Tower, South Convention Lobby

**HOURS:**
Thursday, March 15
08:30am - 06:00pm

Friday, March 16
08:30am – 06:00pm

Saturday, March 17
08:00am - 04:30pm

**COMMUNICATIONS TABLE**
Here you can find information on StudyArchitecture.com, the #IMADETHAT campaign, design competitions, publications, and more. We will have buttons, pins, and stickers for you to wear and share. Use #ACSA106 to show how you wear your #swag.

Vegas Altas Congress Center
Luis Pancorbo, University of Virginia
Ines Martin, University of Virginia

ARCHITECTURE OF THE OTHER 99%?
POWER, ECONOMY, AND THE DILEMMA OF HISTORY
Moderator: Ole W. Fischer, University of Utah
By translocating the provocative motto of the occupy movement into the field of architecture, this session convenes four reflections about the charged relationship between architecture, power, and economy. How can architecture become empowering and liberating for diverse constituencies, especially the ones so far deprived of design services? What is the role of architectural history, which seems more often than not to narrate a “winners’ story”? What about histories of alternative practices and critical modes of spatial agency?

Architectural Violence and Architectural Power: The Fall of Postmodernism and the New Empowerment
Jeffrey Mansfield, MASS Design Group
Michael Murphy, MASS Design Group

Resistance Through Form: Masonry Synthesis Structures in the Design of a New Residential Architecture for Khartoum, Sudan
Mohamed Ismail, Massachusetts Institute of Technology

Behind the Sealed-up Doors: The New Urban Renewal Movement in Beijing
Wei Zhao, University of Utah
ECOLOGICAL ETHICS (AND THE ROLE OF THE ARCHITECT) III
Moderators: Michael A. McClure, University of Louisiana at Lafayette
Ursula Emery McClure, Louisiana State University
Some of the most pressing ‘ethical challenges of architecture in a world in flux’ might be those surrounding the role of the built environment in climate change. The field of environmental ethics has allowed us to extend the scope of our ethical considerations to non-human inhabitants and systems. How does the architect engage and serve a non-human clientele that has no voice or means to communicate needs? How does this engagement alter our built environment?

Algorithmic Ecologies: Integrating Dynamics and Real-time Simulation Feedback for Design Optimization
Kelly Winn, Rensselaer Polytechnic Institute

Net Zero is Not a Choice but an Ethical Practice: Evolution of Net Zero Building
Ming Hu, University of Maryland

The Avian Ethics of Facades: Considering Wildlife Constituencies in Architectural Design
Scott Murray, University of Illinois, Urbana-Champaign

HISTORY AND THEORY AS METHODS OF ETHICAL ENGAGEMENT?
Moderators: Anna Gloria Goodman, Portland State University
Sharone Tomer, Virginia Tech
This panel will discuss how architectural history/theory coursework serves as a pedagogical method of ethical engagement. The papers will present a range of perspectives: raising theoretical, historical and pragmatic questions about how to make history/theory coursework less Eurocentric, more cross-cultural, and a productive forum for discussing the politics of architecture. The panel will examine how history/theory courses address questions of race, inequality and systemic exclusion, and equip students to make ethical decisions in practice.

Decolonizing Architectural Pedagogy
Shundana Yusaf, University of Utah

Organic Intelligence: Walking, Living, and Attuning Systems
Nathaniel Stern, University of Wisconsin-Milwaukee

Julie Larsen, Syracuse University
Roger Hubeli, Syracuse University

Uncertain Material Engagements
James C. Forren, Dalhousie University

Architecture students in accredited professional programs are not currently expected to read basic texts on urbanism or learn the fundamentals of urban design. Although some students, depending on their individual instructors, may receive an exemplary introduction to these subjects, architecture students’ understanding of cities, suburbs, and the built environment, as a group, is ad hoc insofar as NAAB (National Architectural Accrediting Board) curriculum standards require no coursework in urbanism or urban design. In an era of global urbanization, escalating chronic disease, and climate change threatening many millions, if not billions, of people, is it ethical—given architects’ responsibilities to public health, safety, and welfare—to not provide future architects with basic education in the theories of urbanism and the practices of urban design? This panel addresses this question and examines the ways a number of leading educators have introduced these topics to their students, which may serve as models for other faculty and degree programs.

Doug Kelbaugh, University of Michigan
Michaele Pride, University of New Mexico
Georgeen Theodore, New Jersey Institute of Technology
June Williamson, City College of New York

Conference registrants can mingle and visit our sponsors and exhibitors while enjoying coffee & tea.
NEW FACULTY TEACHING AWARD
Moderators: Elizabeth Seidel, American Institute of Architecture Students
Corey Griffin, Portland State University
Recognizes demonstrated excellence in teaching performance during the formative years of an architectural teaching career.
Danielle Shea Willkens, Auburn University
Ashlie Latiolais, University of Louisiana at Lafayette

NEITHER FORM NOR PLACE: THE CASE FOR SPACE I
Moderator: Thomas Forget, University of North Carolina at Charlotte
Post-critical practitioners and educators strive to engage the lived-reality of the built environment, typically foregrounding performance and technology over form and ideology. This panel confronts a potential (and preventable) consequence of that aspiration: a deficit of spatial thinking applied to matters of organization and connectivity. Looking within and beyond the post-critical discourse, it engages the field of geography to posit space as a socially produced environment that both transcends built form and is inextricably a function of it.

Architectural Volition, or What Does Form Mean?
Hans Morgenthaler, University of Colorado Denver

DISCIPLINARY HYBRIDS: LANDSCAPE AS ARCHITECTURE. ARCHITECTURE AS LANDSCAPE. AND THE PROBLEM IS...
Moderators: Dragana Zoric, Pratt Institute
Evan Tribus, Pratt Institute
If the Modern movement considered Architecture as an object, with Landscape as an accessory, and the Supermodern movement considered Architecture as a field effectively co-opting Landscape practices, we believe future ethical practices will correlate the two disciplines into a disciplinary hybrid. Thus, as we increasingly leverage Architecture’s expertise in organizational logics, formal robustness, and spatial complexity with Landscape’s expertise in the organization of dynamic systems, fluctuation, temporality, and change, questions about the ethical results of this hybrid must be addressed.

11:00 – 12:30 TOWER COURT C

Paper Session

OPEN: HISTORY/THEORY
Moderators: Leslie K. Van Duzer, University of British Columbia
This session focuses on the dynamic nature of the ethics of architecture in two contexts: contractual relationships and the design of commemorative sites. A historical account reveals the evolution of the owner-architect-builder triangle in response to shifting ethical concerns. An examination of “memory-work” challenges designers to reconsider normative notions of memory and commemoration. Finally, an analysis of Günther Domenig’s Documentation Center in Nuremberg offers the historical context for a contemporary reckoning with “very difficult memory.”

JAE: THE PROJECT OF PROJECTION

Moderators: Carolina Dayer, Aarhus School of Architecture
            Ivan Rupnik, Northeastern University

How do architects write and theorize about and with their projects? If, as Italian philosopher Giambattista Vico stated, “verum ipsum factum (the true is what is made)”, how do architects navigate from thoughts into projects and from projects into thoughts? Within any process of translation there are certainly detours, unexpected discoveries, and the emergence of new meanings. This special JAE session will focus on presenting various ways in which Design as Scholarship can be understood, expressed, and expanded. The session relates to JAE’s most recent issue which questions what it means ‘to project a project’, what are the tools that play a role in its making, and what are the ideas that a project offers during and after its realization. Design as Scholarship, a foundational category in the journal, attempts to challenge the reflective side of practice, one where the theory of practice and the practice of theory lead to a robust synergy rather than a polar division.

Heather Flood, Woodbury University
Kevin Hirth, University of Colorado
Marc Neveu, Woodbury University
Pari Riahi, University of Massachusetts Amherst
Peggy Deamer, Yale University

ADVANCING DESIGN-BUILD PEDAGOGY + RESEARCH: LESSONS FROM RURAL STUDIO & COLORADO BUILDING WORKSHOP

Moderator: Xavier Vendrell, Rural Studio, Auburn University

Design-build programs do not work without the support of the core curriculum. To fully engage the project students need a working knowledge of assemblies, materials, and environmental controls – all subjects often taught back on campus and in classrooms. Correct placement of design-build coursework in the educational sequence is critical to matching student ability with the expectations of the design-build project. However, situated through necessity and sometimes convenience, design-build courses are not always where they should be. In this session, we will discuss the placement of design-build coursework in relationship to all the courses it needs to thrive. Using the curricula from Auburn University’s Architecture Program and the University of Colorado’s College of Architecture and Planning, we will examine the current pedagogical strategy between campus and their design-build programs; Rural Studio and Colorado Building Workshop.

Xavier Vendrell, Rural Studio, Auburn University
Mary English, Auburn University
Emily McGlohn, Rural Studio, Auburn University
Rick Sommerfeld, Colorado Building Workshop, University of Colorado Denver
Will Koning, University of Colorado Denver
Osman Attmann, University of Colorado Denver

NAAB 101: DIGITAL ACCREDITATION

This will be an interactive session for faculty, administrators, individuals interested in serving on visiting teams, and anyone seeking a better understanding of what accreditation is and how the NAAB works. The session will cover accreditation basics, general information about the NAAB, 2015 enrollment and faculty statistics, and an introduction to the 2014 Conditions for Accreditation. The session will be free-flowing and interactive. All are welcome.

Daniel Friedman, University of Hawaii at Manoa
John Cays, New Jersey Institute of Technology

OPEN HOUSE: University of Colorado Denver, College of Architecture & Planning

Conference registrants are encouraged to explore downtown Denver and its many restaurants. Also, make sure to visit the University of Colorado Denver’s College of Architecture & Planning to check out student and faculty work!

  Maya Przybylski, University of Waterloo
PRODUCT/PROCESS: BALANCING DELIVERABLES
IN ACADEMIC DESIGN/BUILD
Moderator: Chad Schwartz, Kansas State University

In academic design/build, a potential conflict arises when seeking to serve both students and clients. While the simultaneous delivery of process-driven educational content to the students and a product to the client may be achieved harmoniously, this is not always the case. This session examines the ethical underpinnings of academic design/build’s intersection of the student and the professional, of pedagogy and practice. With so much riding on successful outcomes for both current and future participants, which stakeholder becomes the priority?

URBANISM
Moderators: Jennifer Bonner, Harvard University

Designers and scholars study and engage the differences between private and public, individual and societal spaces, incorporating buildings and public space in a variety of scales and densities within an increasingly global context. Two well-developed research trajectories are smart growth and new urbanism, and we solicit posters from our members working in these areas. In addition, we are seeking proposals that redefine architecture, urban design, city planning, and life in the cyber-age, in unexpected terms. We recognize that positions taken today may be located on the periphery of the architectural discourse but are poised to make a significant impact tomorrow.

There’s a reason you became an architect. It wasn’t just about buildings. It was about people; it was about making communities more livable. AIA Center for Communities by Design

1996 - The atmosphere surrounding architecture education and the profession...is one of enormous promise and possibilities...In the search for educational renewal at all levels, including the professional, care should be taken not to ascribe to schools alone what must, in the end, be a shared responsibility. Building Community, A New Future for Architecture Education and Practice, by Ernest L. Boyer, PhD and Lee D. Mitgang

2016 - ...the profession enjoys better technology, better construction methods, better visualization software, improved codes and standards, and generally better performance. On the other hand, it suffers professional curricula still largely unresponsive to changing conditions and requirements for practice; a profession still hamstrung by misalignment between knowledge and regulation; cities still deadened by trivial design, inadequate affordable housing, and unlivable neighborhoods...Goat Rodeo – Daniel S. Friedman, PhD, FAIA

Twenty years have passed between these two statements and where are we? The AIA has put together this dynamic 90-minute session with panelists from academia and practice to discuss areas of tension between higher education and practice. We will aim to generate ideas, provoke discussion and explore solutions to some of our shared challenges such as: Basic knowledge, Value & Impact, Technology, Research, Social Responsibility, and Collaboration.

THE INTIMATE REALITIES OF WATER
Producer: Adrian Parr, University of Cincinnati

The Intimate Realities of Water is a series of cinematic portraits that examine the power dynamics of water and slums. The film is a social commentary that also chronicles the complex relationship between water, poverty, gender, sanitation, health, and development in shantytowns.

For four years the producer of The Intimate Realities of Water has documented how water influences everyday life in two of Nairobi’s slums, Kibera and Dagoretti, where she has come to know many of the residents and non-governmental organizations. It is a moving and intimate glimpse into how poor environmental conditions impact people, and more specifically the challenges women slum dwellers face.

The camera also turns to several water and sanitation projects that respond to the problem of clean, affordable, and accessible water services. These projects are held in stark contrast to profit driven development models that use the mechanism of the free market to respond to water and sanitation challenges in the slums.

NAAB PAST PRESIDENTS’ COUNCIL MEETING

The NAAB is pleased to host the first meeting of its Past Presidents’ Council. All past presidents of the NAAB who are attending the ACSA Annual Meeting are invited to join this private gathering, where current NAAB officers will engage the legacy leadership in a discussion about historical successes, recent transitions, and future directions.

Downtown Tucson 2050 Plan
Courtney Crosson, University of Arizona

04:30 – 06:00
TOWER COURT A
Paper Session

BY ANY MEANS NECESSARY
Moderators: Britt Eversole, Syracuse University
Mireille Roddier, University of Michigan
Architectural ethics arises from a questionable presumption—that the obligations of the architect to the patron and, to a far lesser extent, the general public guide his or her decisions and actions. In this session, we will look at instances in which the written and unwritten codes of ethics are questioned, through both historical and contemporary case studies, and reveal how architectural ethics tend to be far more focused on the insulation, maintenance and protection of the profession than on the consequences of architectural actions

Jefferson, Hip-Hop, and The Grid
Sekou Cooke, Syracuse University
Nadia M. Anderson, University of North Carolina at Charlotte

Outside: Extreme Environments and Creative Resistance
George Elvin, Ball State University

Deja Vu: Ethics of a Gentleman’s Club
Marc Maxey, University of Nebraska-Lincoln

Real Estate, Ethics, and the Problem of Pan Am
Michael Kubo, Massachusetts Institute of Technology

04:30 – 06:00
TOWER COURT B
Paper Session

OPEN: URBANISM
Moderator: Carie Penabad, University of Miami
Identifying, analyzing, and understanding issues of equity in cities includes a multitude of complex factors ranging from data collection to innovative design practices. This open panel session will highlight global case studies that present varying approaches to urban sustainability, examining the economic, political, cultural, and climatic contexts that give rise to contemporary urban forms.

Visualizing Equity: Learning from “Data Science for Social Good” in the Built Environment
Gundula Proksch, University of Washington
Rachel Berney, University of Washington

Marine Urbanism: The Impact of Sea Level Rise on the Identity of Future Cities in The Bahamas
Kenyon Osborne, Miami University

A Comparative Study of Environmental Performance Indicators of Asian Eco-Cities
Zhongjie Lin, University of North Carolina at Charlotte

Tourism and Ethics in Japanese Shrinking Cities
Mari Fujita, University of British Columbia
EDUCATING FOR HUBRIS OR HUMILITY?
Moderator: Kevin Mitchell, American University of Sharjah
The introduction to Canon I of the AIA Code of Ethics and Professional Conduct encourages architects to, “… exercise learned and uncompromised professional judgment”, and certainly judgment is necessary when practicing in a context that is not one’s own. This session explores approaches to architectural education which seek to overcome hubris in order to instill the humility that can serve to “decenter” students and foster critical engagement with contexts that are not their own.

A Place-Based Ethic of Care: The Beginnings of the Utah School
Keith Diaz Moore, University of Utah

Creating an Academic Community of Inquiry: Educating Architects to Embrace a People-Centered View
Lauren Matchison, University of Southern California

Empathizing with Clients: Teaching Students How to Design for ‘The Other’
Alexis Gregory, Mississippi State University

DESIGN RESEARCH IN THE STUDIO CONTEXT
Moderator: Scott Lawrence, University of Idaho
The 1996 Boyer Report on architectural education described it as the “holy of holies” of architectural education: “these studios scruffy though they may be are models for creative learning that others on campus might well think about.” Since the Boyer report was written design has become a hot trans-disciplinary phenomenon, putting the architecture studio in an enviable position relative to our peers in the academy.

Augmented Bubbles
Mara Marcu, University of Cincinnati
Ming Tang, University of Cincinnati
Adam Schueler, University of Cincinnati

Framing Research for Design: Investigating the Context of Mass-Customized Dwelling in San Francisco
Brian Kelly, University of Nebraska-Lincoln

From Waste to Wonder
Nikole Bouchard, University of Wisconsin-Milwaukee

Saving the Planet Through Thesis
Karen Lange, California Polytechnic State University

Studio Dilemma in Study Abroad Programs
Anthony Cricchio, University of Oklahoma

Supple[Core]: Interaction Design as a Design Tool
Ebrahim Poustinchi, Kent State University

The Living Archive and the Sublime Nature of the Anthropocene: A Design Studio Model
Julie Larsen, Syracuse University

Tiny Footprints: Variations on the Hong Kong Pencil Tower
Jason F. Carlow, American University of Sharjah

ARCHITECTURE’S APPROACH TO STEM
Moderator: Hazem Rashed-Ali, University of Texas At San Antonio
This session will open a dialog on how architecture schools can position themselves to access STEM funding streams for research, teaching, and student aid. ACSA schools are at different points of development in pursuing this support. Members of ACSA’s Research & Scholarship Committee will engage the audience in identifying successful strategies and navigating obstacles.

ACSA Research & Scholarship Committee: Marc Neveu, Woodbury University; Kelly Bair, University of Illinois at Chicago; Corey Griffin, Portland State University & Kentaro Tsubaki, Tulane University
Sponsored by the Tau Sigma Delta, National Honor Society

Tod and Billie began working together in 1977 and co-founded their architectural practice in 1986. Located in Midtown Manhattan, their studio focuses on work for institutions including schools, museums, and not-for-profits—organizations and people that value issues of aspiration and meaning, timelessness and beauty. They believe that architecture is the coming together of art and use. Their buildings are carefully made from the inside out to be functional in ways that speak to both efficiency and the spirit. A sense of rootedness, light, texture, detail, and most of all, experience, are at the heart of what they design. From the early sketches through construction completion, they are personally involved in every project their studio takes on.

Over the past three decades they have received numerous national and international citations. Outside the studio, they are active participants in the cultural community and have long-standing associations with many arts organizations. Parallel to their practice, they maintain active academic careers and lecture worldwide. As both educators and practitioners, they are deeply committed to making a better world through architecture.

Tod Williams will join us in Denver to accept the Gold Medal and deliver the closing keynote.

Conference registrants are invited to the closing party hosted by the University of Colorado Denver.
ACTARD

AMERICAN INSTITUTE OF ARCHITECTS (AIA)
For more than 150 years, the members of the American Institute of Architects have worked to advance our quality of life through design. From designing the next generation of energy-saving buildings to making our communities healthier and more vibrant, from helping neighborhoods rebuild after disasters to exporting American design know-how to the rest of the world, architects turn dreams and aspirations into reality. Decisions are being made every day that affect the way architects practice by federal, state, and local lawmakers, and AIA Advocacy aims to serve its members as the voice of the profession to the decision-makers at all levels of government. Whether you are looking to make a difference in your local community or abroad on an architectural services trade mission, AIA Advocacy gives you the tools you need to make the impact you desire.

AMERICAN INSTITUTE OF STEEL CONSTRUCTION (AISC)
The American Institute of Steel Construction (AISC), headquartered in Chicago, is a non-partisan, not-for-profit technical institute and trade association established in 1921 to serve the structural steel design community and construction industry in the United States.

ArchCAS
ArchCAS™, the Liaison-powered Centralized Application Service (CAS™) for architecture programs, serves as a marketplace for prospective students to research and apply to multiple master’s programs with a single set of applications. ArchCAS is free to all ACSA member schools and programs, and provides a platform for driving applicant volume, cloud-based admissions software, analytical and communication tools and processing, verification, and integration services. This service is provided through a partnership between the Association of Collegiate Schools of Architecture and Liaison International, the leading provider of higher education admissions management and enrollment marketing solutions.

LIAISON INTERNATIONAL
Our admissions management and automated enrollment marketing solutions and services help you reach prospective students, streamline administrative tasks to deliver exceptional inquiry and application experiences across the full enrollment cycle — from your prospective student’s first interest to their first day on campus. We are the leading provider of higher education admissions management and enrollment marketing solutions.

ARCHITECT’S NEWSPAPER
The Architect’s Newspaper serves up news and inside reports to a niche community of architects, designers, engineers, landscape architects, lighting designers, interior designers, academics, developers, contractors, and other parties interested in the built urban environment. The Architect’s Newspaper delivers quality news and cultural reporting through print, web, blog, newsletter, or twitter—all the news you want, in all the ways you want to get it.

Come visit the communications table to learn more about what we are doing and learn how to get your students’ work featured on StudyArchitecture.com.
AMERICAN INSTITUTE OF ARCHITECTURE STUDENTS
The American Institute of Architecture Students (AIAS) is an independent, nonprofit, student-run organization dedicated to providing unmatched progressive programs, information, and resources on issues critical to architecture and the experience of education. The AIAS aims to promote excellence in architectural education, training, and practice; to foster an appreciation of architecture and related disciplines; to enrich communities in a spirit of collaboration; and to organize students and combine their efforts to advance the art and science of architecture.

BLOOMSBURY PUBLISHING
Bloomsbury Publishing is a leading independent publishing house established in 1986. It has companies in London, New York, Sydney and New Delhi. Its four divisions include Bloomsbury Academic and Professional, Bloomsbury Information, Bloomsbury Adult Publishing and Bloomsbury Children’s Publishing.

NATIONAL COUNCIL OF ARCHITECTURAL REGISTRATION BOARDS (NCARB)
The National Council of Architectural Registration Boards protects the public health, safety, and welfare by leading the regulation of the practice of architecture through the development and application of standards for licensure and credentialing of architects.

NATIONAL ORGANIZATION OF MINORITY ARCHITECTS (NOMA)
The National Organization of Minority Architects (NOMA) mission is to champion diversity within the design professions by promoting the excellence, community engagement, and professional development of its members.

ROUTLEDGE & TAYLOR & FRANCIS GROUP
Founded in 1836, we are a global publisher of academic books, journals and online resources in the humanities and social sciences. Today we publish some 600 journals and around 2,000 new books each year, from offices all over the world. Our current publishing program encompasses the liveliest texts, and the best in research. Our books backlist has over 35,000 titles in print. We take pride in the range and strength of the backlist and we use the latest technology to promote it using a wide range of formats, both in print and online.

TAU SIGMA DELTA (TSD)
Tau Sigma Delta was organized in 1913 at the University of Michigan at the suggestion and guidance of the faculty in Architecture and Landscape Design who selected the first group of senior honor students to be the founding members. Tau Sigma Delta has developed from a senior honor society in Architecture and Landscape Architecture to become inclusive of both juniors and seniors in Architecture, Architectural Engineering, Architectural Design, Landscape Architecture, Painting, Sculpturing, Planning, Decorative Design, Interior Decoration, and all the arts allied with Architecture.

National Architectural Accrediting Board (NAAB)
The National Architectural Accrediting Board (NAAB) accredits professional degrees in architecture offered by institutions accredited by a U.S. regional accrediting agency. All 54 U.S. registration boards accept the NAAB-accredited degree for registration; 37 of those boards require it.

THE PLAN
THE PLAN Journal (TPJ) intends to disseminate and promote innovative, thought-provoking and relevant research, studies and criticism in architecture and urbanism. The idea to launch the TPJ was born out of the realizations that academia is too often conducting research disengaged from the challenges and problems confronted in the professions and that in practice research can be afforded, with limited platforms for dissemination, only in a small number of cases of professional organizations. The ultimate purpose of the TPJ is thus to enrich the dialog between research and professional fields, in order to encourage both applicable new knowledge and intellectually driven modes of practice.

urbanNEXT
urbanNext is a multi-platform aimed at developing, disseminating and distributing content centered on architecture through a focus on the contemporary human milieu and its challenges. urbanNext associates space is designed to establish a networking structure for collaborations between members, either in the organizations category or on an professionals level, who have an interest in working, thinking and reflecting on design practices and the future of the urbanized environment.

WILEY
Wiley’s Global Research business is a provider of content-enabled solutions to improve outcomes in research, education and professional practice with online tools, journals, books, databases, reference works and laboratory protocols. With strengths in every major academic, scientific and professional field, and strong brands including Wiley Blackwell and Wiley VCH, Wiley proudly partners with over 800 prestigious societies representing two million members. Through Wiley Online Library, we provide online access to a broad range of content: over 4 million articles from 1,500 journals, 9,000+ books, and many reference works and databases. Access to abstracts and searching is free, full content is accessible through licensing agreements, and large portions of the content are provided free or at nominal cost to nations in the developing world through partnerships with organizations such as HINARI, AGORA, and OARE.
