

# NEW INSTRUMENTALITIES

**2018 ACSA/COAM INTERNATIONAL CONFERENCE**

**JUNE 14-16, 2018 | MADRID, SPAIN**

# WELCOME TO MADRID!

## ABOUT THE CONFERENCE

In light of the multiple crises our cities are facing, architecture is now in a position to contribute positively to salvage and invigorate the urban realm. After a decade of recasting ourselves through cultural, technological, environmental, and social engagement, we—architects—seek to deploy a newly found adroitness to address the different paradigm shifts that render our cities less just, plural, safe, entertaining, productive, and environmentally proficient.

El Colegio Oficial de Arquitectos de Madrid (COAM)

## CO-CHAIRS

Iñiqui Carnicero, Columbia University  
Ángela García de Paredes, Universidad Politécnica de Madrid  
Julio Salcedo-Fernandez, City College of New York

**Disruption:** “Disruptive” digital economies and their impact of the social economic fabric of cities: “Disruptive” economies are transforming our cities. Uber, Amazon, Airbnb, etc. are changing the social and economic fabric of cities often displacing the disenfranchised. An example of which were the recent citizens’ revolt against Airbnb as new tourist protocols are transforming cities and disrupting the essence of a community. Topic Chairs: Shawn Rickenbacker, City College New York & Martha Thorne, IE University

**Inequality – People and Capital Flows:** Historical and emerging people and capital flows are contributing to the city as a stage for augmented inequalities. The growing global inequalities as generated by real estate speculation and migrations are finding in the city a territory to intensify rather than abate a sense of equality and community. The migration trends have recently intensify beyond the rural to urban migration to include a growing number of refugees of war. Topic Chairs: Neeraj Bhatia, California College of the Arts & Josep Bohigas, Barcelona Regional

**Public Space:** The changing politics and protocols of public space. Public space in the city is being continuously contested. The most egregious of these challenges comes from the recent terrorist attacks on cities across the world. More nuance challenges and opportunities are appropriations of public space and its monuments to legitimate or question power, history, memory, gender, cultures and race. Lastly, the public space of the city has become a regional and global destination for celebration and protest amply augmenting its scope. Topic Chairs: Frederick Bonet, Obras & Momoyo Kaijima, University of Tsukuba

**Environmental Crisis:** Comprises management of environment and resources, and the challenges of consumption and resiliency. We have enumerated multiple flanks of attacks on the city and we have yet to broached perhaps the most grave ones. As Houston floods, Miami sinks and Beijing chokes, the changes brought about by climate change and resource management are beyond palpable, already catastrophic. Topic Chairs: Jane Hutton, University of Waterloo & Andres Mignucci, Universidad De Puerto Rico

**Nascent material conscience** has emerged aiming to empower local resources, addressing the economy of means and the need for new identities. The lack of real estate in some cases and busting economies in others, have increased the need of repurposing what already exists, reinforcing strategies of adaptability, transformation and reuse, therefore rising awareness of the behaviour and evolution of architecture over time. Topic Chairs: Sunil Bald, Yale University & Nader Tehrani, The Cooper Union

**Open** topic presentations are consistent with the general theme of the conference, **New Instrumentalities**, and are grouped according to overarching themes that emerged from the open call. Topic Chairs: Lesley Lokko, University of Johannesburg & Juan Roldan, American University of Sharjah

## THE HABITUS OF THE ARCHITECT

Moderator: Ilaria Valente, Politecnico di Milano

The focus of the EAAE-sponsored session at the ACSA/COAM International Conference will be on the changing role, position and habitus of the architect. We would like to embed this theme within the overarching topic of the conference "new instrumentality" - and the role of architectural education. The invited speakers/panelists will take a clearly articulated stance towards this topic, each presenting a short but strong statement, followed by discussion - first among the panelists, then opening to the audience.

## URBANISM SPECIAL FOCUS SESSION

Moderator: Francisco J. Rodríguez-Suarez, Universidad De Puerto Rico

Urban design is not simply a larger scale of architectural work, but a different attitude towards the responsibilities a designer has beyond each project's property lines. This session will discuss the relationship between architecture pedagogy and urbanism in various international systems and programs and the desirability for its inclusion within the NAAB criteria of accreditation.

## OPENING KEYNOTE: JUAN HERREROS

Introductions: Iñáqui Carnicero, Columbia University

PhD Architect, Chair Professor of Architectural Design at Madrid School of Architecture and Full Professor at the GSAPP of Columbia University in New York. He has previously taught at Princeton University between 2004 and 2007, at the Architectural Association between 1998 and 2000 as a 'Diploma Unit Master', at the EPF in Lausanne from 1999 to 2000 as 'Professeur Invité' and at the IIT in Chicago as 'Morgenstern Visiting Chair in Architecture' in 2006. He has been appointed juror in numerous national and international competitions, biennials and international awards, editorial advisor of specialized media and member of several expert committees on academic, sustainability and technology programs such as the Material Science Congress at the University of Columbia.

Juan Herreros has taught hundreds of conferences, courses, seminars and research workshops worldwide. In 2013 he published 'Dialogue Architecture', which covers the homonymous installation designed for the Venice Biennale in 2012. In 2008, the book 'Vivienda y Espacio Doméstico del Siglo XXI' (21st century housing and domestic space) came out, featuring his interventions at the homonymous seminar delivered at La Casa Encendida; as well as 'Implicit Performance', on experimental applications of concrete. In 2004, the books 'Isla Ciudad' (Actar) and 'Palacios de Diversión' (Fun Palaces – Exit LMI). In 2000, 'Caducidad, Educación y Energía' (Expiry, Education and Energy) on the Potteries Thinkbelt project by Cedric Price (Fundación COAM Madrid). 'In collaboration with I. Ábalos, he had previously published 'Tower and Office' edited by the prestigious MIT Press, 'Natural-Artificial' (LMI), 'Técnica y Arquitectura en la Ciudad Contemporánea' (Technique and Architecture in the Contemporary City – Nerea) and 'Le Corbusier-Rascacielos' (Le Corbusier-Skyscrapers). He currently develops a critical edition on the works of Cedric Price, along with an investigation entitled 'Prácticas emergentes en Arquitectura' (Emergent Practices in Architecture) based on the idea of recycling the figure of the architect and his design techniques, bearing the name of the Research Group which he leads at the Polytechnic University of Madrid. In 1984 he founded Ábalos&Herrerros; in 1999, the LMI (Liga Multimedia Internacional); in 2006, Herreros Arquitectos and in 2014, estudio Herreros.

### CLOSING KEYNOTE: MOMOYO KAIJIMA

Introductions: Ángela García de Paredes, Universidad Politécnica de Madrid

Momoyo Kajima is principle architect and co-founder of Atelier Bow-Wow. She opened this Tokyo-based firm with Yoshiharu Tsukamoto in 1992. The firm designs residential, commercial and public spaces in Tokyo, Europe and here in the US.

The firm specializes in domestic and cultural architecture in addition to urban research. Atelier Bow-Wow's research is the heart of an experimental project 'micro-public-space' which is a novel conceptualization of the public space. The firm's other speciality is the creation of public art based on the theory of "behaviorology".

Kajima is a visiting Adjunct Professor at Columbia GSAPP. Kajima is a graduate of the Japan Women's University and the Tokyo Institute of Technology. She was the 2012 RIBA International Fellow.
