Introduction

Report Summary

Founded in 1912 to advance the quality of architectural education, the Association of Collegiate Schools of Architecture (ACSA) represents all accredited programs and their faculty across the United States and Canada, as well as nonaccredited and international affiliate members around the world. The ACSA Institutional Data Report combines data collected by ACSA with data reported to the National Architectural Accrediting Board (NAAB), the Integrated Postsecondary Educational Data System (IPEDS), the Carnegie Classification of Institutions of Higher Education, and other architecture organizations to investigate current and historical metrics of institutional effectiveness and begin to allow for peer institution comparisons. The report details more than 1,120 architecture degree programs at 726 institutions in the United States and Canada including trends in student enrollment, degrees offered, STEM designation, and regional reporting on student:faculty ratios and on-time graduation rates.

Read more at acsa-arch.org/institutional-data.

Undergraduate Admission Statistics

SAT

Using the 25th percentile and the 75th percentile scores reported, the SAT I: Reasoning Test showed an average three part score of 1730 for incoming architecture students. Scores on the Verbal and Writing sections were highly correlated and scores on the Quantitative section were consistently higher than the other two sections. Scores have been static for the last 4 years. Estimated averages for 2019 are as follows:

Verbal: 570-580
Quantitative: 590-600
Writing: 560-570
Undergraduate Admission Statistics

ACT

Scores on the ACT have showed relative consistency from 2009 - 2019 with a slight decline in recent years. On the whole, scores proved to be fairly consistent across accredited programs reflecting little change between 2018 and 2019 statistics.
Graduate Admissions Statistics

GRE

The Graduate Record Examinations (GRE) proved to be fairly consistent across accredited programs. The average scores for incoming students have been 154 and 152 on the GRE Quantitative and Verbal sections respectively. GRE Analytical scores averaged 3.7 since 2014 which is a dramatic increase from prior years.

Classification of Instructional Programs (CIP)

CIP CODE CHANGES FROM 2018-2020

Since the publication of the 2018 ACSA White Paper on Architectural Education Research and STEM, the number of architecture programs at ACSA member schools has more than quadrupled. In 2018 the ACSA Research and Scholarship Committee verified 13 institutions that utilized the only STEM-designated CIP Code for architecture and related services, 04.0902. Since that time, over 50 institutions have successfully changed their CIP code and many more are pursuing this change.

Classification of Instructional Programs (CIP)

NEW 2020 CIP CODE CROSSWALK

The sixth edition of the Classification of Instructional Programs (CIP) provides a revised system for classifying programs of study currently being offered at colleges and universities around the country. Released in July 2019, the National Center for Education Statistics (NCES) has added over 300 new CIP codes, nine of which fall under Architecture and Related Services (CIP 04). While data from this change will not be made public until 2022, postsecondary institutions will use the 2020 CIP when they report the degrees and certificates awarded for the 2020 Integrated Postsecondary Education Data System (IPEDS) Completions Survey later this year.

Peer Institution Regions

ACSA Regions for Research

Using regions created by the U.S. Census Bureau and the Carnegie Classification of Institutions of Higher Education, the following regions were created specifically for the purpose of identifying peer institutions within architectural education. The map below shows the 11 comparative regions. This reformatted research metric allows ACSA to track regional shifts in the enrollments, budgets, and faculty dynamics of NAAB-accredited and candidate members, and Canadian CACB-accredited members. On the following pages, graduation rate is defined as the percentage of students who graduate within the published time to completion.

Note: Limited data are available for the Outlying Areas and Canada regions.
Region: New England

13 Institutions

Enrollment trends for the Northeast show one of the smallest number of students pursuing B.Arch degrees across all regions. In the past 10 years, enrollment in M.Arch programs remained steady. Based on the 2019 data reported to NAAB, this region boasts the lowest student:faculty ratio and the highest M.Arch on-time graduation rate. Moreover, the region also reported one of the lowest average on-time graduation rates for B.Arch programs for 2019.

Student:Faculty Ratio - 9:1

[Graph showing enrollment trends from 2009 to 2019 for Preprofessional, M. Arch, and B. Arch programs]
Region: Middle Atlantic

23 Institutions

Trends in enrollment for the Middle Atlantic region show substantial growth in preprofessional enrollment by means of adding new schools to the NAAB roster in 2018. This region reports the largest number of students pursuing B.Arch degrees across the country. Enrollment in this degree program has seen a minimal decline over the past 10 years but may correspond to the slight increases in M.Arch enrollment. This region boasts the second lowest student:faculty ratios as compared to the other regions.

Average Graduation Rates

</tbody>
</table>

Student:Faculty Ratio - 11:1
Region: South Atlantic

21 Institutions

Enrollment trends in the South Atlantic region show the largest enrollment of students pursuing an M.Arch degree across all regions. This region is second in total enrollment only to the Middle Atlantic region. Preprofessional degree programs showed a significant drop in enrollment this past year. Conversely, enrollment in M.Arch degrees increased last year.

Student:Faculty Ratio - 15:1
Region: East South Central

6 Institutions

Trends in enrollment in the East South Central show continued stability. Based on the 2019 data reported to NAAB, this region boasts the highest average on-time graduation rates for preprofessional programs and one of the lowest enrollment numbers for preprofessional degree programs. This region reports the lowest enrollment in the mainland United States.

Average Graduation Rates

<table>
<thead>

</tbody>
</table>

Student:Faculty Ratio - 13:1

Trends in enrollment in the East South Central show continued stability. Based on the 2019 data reported to NAAB, this region boasts the highest average on-time graduation rates for preprofessional programs and one of the lowest enrollment numbers for preprofessional degree programs. This region reports the lowest enrollment in the mainland United States.
Region: West South Central

15 Institutions

Enrollment trends for the West South Central region show the second highest on-time graduation rates for B.Arch and M.Arch degrees but the lowest graduation rates for preprofessional degrees. The West South Central also reports the second highest student:faculty ratios across all regions. Notably, this region shows an increase in enrollment numbers across professional degree types from 2017 to 2019.

Average Graduation Rates

<table>

</tr>
</tbody>
</table>

Student:Faculty Ratio - 17:1
Region: East North Central

19 Institutions

Trends in enrollment for the East North Central region show the largest number of preprofessional students despite a substantial decline from the 2009 high and an increase in enrollment across all degree types. The region continues to report the highest average on-time graduation rate for B.Arch programs as reported to the NAAB. This region also reported one of the lowest student:faculty ratios, tied with the East South Central region at 13:1.

Average Graduation Rates

Additional Regions

Canada

Historical enrollment data for Canadian member schools is currently unavailable. However, enrollment reported to StudyArchitecture.com showed stable enrollment numbers from 2017-2018. This region is comprised of 12 CACB schools and more than 35 architecture related degree programs.

Outlying Areas

Along with the East South Central, trends for the Outlying Areas show the smallest number of students pursuing preprofessional degrees and M.Arch degrees across regions. This region is comprised of 6 schools, 4 in Puerto Rico and 2 in the United Arab Emirates. Please note, data for the D.Arch offered in Hawaii can not be aggregated and is not included in this enrollment graph.
Architectural Education Across the Country

- Average National Student:Faculty Ratio: 14:1
Architectural Education Tuition Breakdown

ACSA FULL AND CANDIDATE MEMBER TUITION AVERAGES

The 2018-2019 tuition averages reported below are based on annual tuition figures for NAAB and CACB programs. The data aggregated in the table below were gathered through self-reported information provided to StudyArchitecture.com, the tuition data reported to the NAAB, and tuition figures provided on respective college and university registrar’s websites. On average, public institutions charge 2.0 - 2.5 times the in-state tuition for out-of-state students. Tuition averages for private institutions report little difference between degree type. Consequently, the total cost of tuition for the B.Arch at private institutions is more expensive than the M.Arch due to the longer length of study. Tuition averages for non-Canadian residents to study architecture in Canada are comparable to tuition averages for American students studying out-of-state.

Faculty by Funding Type

Full-Time/Part-Time Trends

Comparing public and private institutions show a larger percentage of private institution faculty working part-time. Numbers indicate that this has long been the practice at private schools and show that part-time faculty are comprising an increasingly higher percentage of the faculty body across the US.
Faculty by Carnegie Type

Full-Time/Part-Time Trends by Carnegie Class

The percentages reported here indicate that schools with higher research rankings have consistently hired more full-time faculty. However, for most of the Carnegie classes, trends still indicate a rise in the percent of part-time faculty over the past six years.
Faculty Credentials by Percentage

Degree Types for Full-Time Faculty

Faculty credentials are often discussed as a way of gauging research capability. While approximately half of the faculty population in NAAB-accredited programs hold an M.Arch, just under one third of the population have completed post-professional and Ph.D programs. In recent years, numbers indicate a small growth in B.Arch credentials and a corresponding decline in post-professional credentials. Moreover, schools continue to report a decline in architectural registration. Schools also report a rapid decline in the percentage of full-time faculty who are registered in U.S. jurisdictions. However, it is worth noting that the statistics below do not include part-time and adjunct faculty, who are often licensed practitioners.
Faculty Credentials: Ph.D. and Licensure

Licensure and Research Degrees

This graphic illustrates the volatility of the number of faculty who are also registered architects in the United States at NAAB-accredited programs. Conversely, the number of the faculty holding doctorates in architecture appears to be rising. These metrics mimic architecture's struggle to find balance between professional experience and research expertise.
Faculty Credentials by Gender

Degree Types for Full-Time Faculty by Gender

As reported by individual institutions, faculty credentials by gender show the increased likelihood that female faculty hold Ph.D.s in architecture or other disciplines. It also shows that male faculty are more likely than females to hold B.Arch degrees and slightly more likely to have obtained M.Archs. Post-professional degrees show little change from the numbers reported last year.
