State

Student Case Study

Wake Technical Community College

- Architectural Technology Associate in Applied Science Degree: 2 years

NC State University

- Bachelor of Environmental Design in Architecture (BEDA) Degree: 3-4 years
Studios: in-semester and summer
Core courses
General Education Program
International Experience Requirement
- Bachelor of Architecture (B.Arch.) Degree: 1 year
- Master of Architecture (M.Arch.) Degree: 2 years
- Master of Advanced Architectural Studies (MAAS) Degree: 1.5 years

The Organization of the plan is separated into zones for walking, resting, and eating. The food truck area has tables and resting locations for students. There is built-in bar stools into the raised platform to allow students to eat 100 bucks while being fully covered and have a safe back with no one behind you, the whole site acts as a walkway so it is made thoroughfare into campus with high traffic of walking students. The underground train line crosses the site through a ramp to the east. The height was considered to be able to fit a bus and food truck under the canopy as well as not feel so low that the tops of the space feel overwhelmed with the "floating" structure above their heads.

Program Relationships

Transfer Pathway

AIA Triangle

- NC State + Wake Tech AIAS Student Chapters
 - Annual Meetings
 - Design Awards Events
 - Golf Tournament
- Scholarships + Design Awards
- Board Membership

Course Instructors

- Wake Tech Professors are NC State Alumni

Portfolio Preparation

Open Houses

Student Advising

Joint Lecture Series

NC State Students in Wake Tech Courses

Geographic Proximity

Speed Dating Instructions

In this activity, community colleges and universities will engage in brief 5 minute meetings to determine if a transfer relationship can be further explored. For each meeting, please complete the questions in the form below.

We recommend that one person from each pair take notes here and submit on behalf of both participants.
